Contents of Volume 56

Volume 56, Number 1, January 7, 1973

AUTHOR INDEX, Volume 56, Number 1 ii

R. H. BUCKINGHAM, A. DANCHIN, and M. GRUNBERG-MANAGO. Denaturation of UGA Suppressor tRNA ^{Trp} from *E. coli* 1

MYLES L. MACE, JR., ROGER W. CLARK and FRANCES E. ARRIGHI. Isolation of Repetitive DNA from Two Mammalian Species using S_1 Nuclease 9

M. M. LONG, D. W. URRY, and B. C. STARCHER. Neutral Site Binding of Calcium Ion to Elastin Coacervate IR Spectroscopy 14

JOHN G. BURR, TERENCE L. McDOWELL and SHERRIL D. CHRISTIAN. A Model for the Binding of Adenosine to Polyuridylic Acid 21

MARGARET E. ACKERMAN, WILLIAM L. REDD and TERENCE J. SCALLEN. Solubilization of 3-Hydroxy-3-Methylglutaryl Coenzyme A Reductase from Lyophilized Rat Liver Microsomes: Lack of Evidence for Cold Lability in this Soluble Enzyme Preparation 29

N. NARASIMHACHARI. The Use of Isomeric Compounds as Internal Standards for Quantitative Mass Fragmentography of Biological Samples. Determination of Homovanillic Acid in Cerebrospinal Fluid and Plasma 36

R. STEPHEN McCOLL and ARTHUR I. ARONSON. Transcription from Unique and Redundant DNA Sequences in Sea Urchin Embryos 47

JAY I. GOODMAN. Hepatic DNA Repair Synthesis in Rats Fed 3′-Methyl-4-Dimethylaminoazobenzene. 52

W. A. CRAMER and T. W. KEENAN. Phospholipase A Activity Is Not Associated with Early Effects of Colicin E1 60

N. MARKS, M. BENUCK, and G. HASHIM. Hydrolysis of Myelin Basic Protein with Brain Acid Proteinase 68

H. BRUCE BOSMANN, MARJORIE W. MYERS, and HERBERT R. MORGAN. Synthesis of DNA, RNA, Protein and Glycoprotein in Mitochondria of Cells Transformed with Rous Sarcoma Viruses 75

F. A. SRÉTER and J. GERGELY, and A. L. LUFF. The Effect of Cross Reinnervation on the Synthesis of Myosin Light Chains 84

PAUL VAN DER WERF and ALTON MEISTER. Isolation of 5-Oxoprolinase from a Prokaryote 90

GEORGE A. BLONDIN. Isolation of a Divalent Cation Ionophore from Beef Heart Mitochondria 97

ENRICO GRAZI. Quantitative Evaluation of the Carbanion Intermediate in the Aldolase Reaction 106

PHILIPPE HEIZMANN. Maturation of Chloroplast rRNA in *Euglena Gracilis* . . . 112

N. YATHINDRA and M. SUNDARALINGAM. Conformation of Cyclic 3′,5′-Nucleotides. Effect of the Base on the Syn-Anti Conformer Distribution . . . 119

MEHER IRANI and P. K. MAITRA. Isolation and Characterization of *Escherichia coli* Mutants Defective in Enzymes of Glycolysis 127

C. F. PENG, D. W. PRICE, C. BHUVANESWARAN, and C. L. WADKINS. Factors That Influence Phosphoenolpyruvate-Induced Calcium Efflux from Rat Liver Mitochondria 134

JUAN A. CURTINO and RANWEL CAPUTTO. Enzymic Synthesis of Cerebroside from Glycosylsphingosine and Stearoyl-CoA by Embryonic Chicken Brain Preparation 142

G. SAUERMANN and P. SWETLY. Nuclear Columns: Labeling and Release of Virus Specific RNA by Nuclei of DNA-Virus (SV 40) Infected Cells 148

G. SAUERMANN. Nuclear Columns: Release of Ribonucleoproteins from Rat Liver Nuclei. 155

J. L. KENT and B. G. T. POGO. Rapid, Periodate-Induced Stimulation of Permeability and Macromolecular Synthesis in Chicken Erythrocytes 161

LÁSZLÓ GRÁF and CHOH HAO LI. On the Primary Structure of Pituitary Bovine Growth Hormone 168

SHIGEKO KIJIMOTO, TERUO ISHIBASHI, and AKIRA MAKITA. Biosynthesis of Forssman Hapten from Globoside by α-N-Acetylgalactosaminyltransferase of Guinea Pig Tissues 177

EFRAIN MERCARDO, JUAN JOSÉ HICKS, CLARA DRAGO, and ADOLFO ROSADO. A Study of the Interaction of Human Spermatozoa Membrane with ATP and Cyclic-AMP 185

ANTHONY G. W. NORDEN and JOHN S. O'BRIEN. Binding of Human Liver β-Galactosidases to Plant Lectins Insolubilized on Agarose. 193

L. VAN ROMPUY, F. LAMBEIN, R. DE GUSSEM and R. VAN PARIJS. The Isolation and Structure Analysis of 2-(2-Cyandethyl)-3-Isoxazolin-5-One, 2-(β, D-Glucopyranosyl)-3-Isoxazolin-5-One and 2-Carboxymethyl-3-Isoxazolin-5-One from Lathyrus Odoratus 199

B. GRINIUVIENE, V. CHMIELIAUSKAITE, and L. GRINIUS. Energy-linked Transport of Permeant Ions in *Escherichia coli* Cells: Evidence for Membrane Potential Generation by Proton-Pump 206

ELLIE EHRENFELD. Interaction of Diethylpyrocarbonate with Poliovirus Double-Stranded RNA 214

HERBERT M. SCHULMAN, J. MARTINEZ-MEDELLIN, and R. SIDLOI. The Oxidation State of Newly Synthesized Hemoglobin. 220

KATHLEEN M. DOWNEY, JOHN J. BYRNES, BONNIE S. JURMARK, and ANTERO G. SO. The Effect of 6-Mercaptopurine and Its Derivatives on Mammalian RNA-Dependent RNA Synthesis 227

W. L. MEYER, L. F. KUYPER, R. B. LEWIS, G. E. TEMPLETON, and S. H. WOODHEAD. The Amino Acid Sequence and Configuration of Tentoxin . . . 234

DAVID CHIA and VERNE N. SCHUMAKER. A Rotor Speed Dependent Crossover in Sedimentation Velocities of DNA's of Different Sizes 241

MUKUND J. MODAK, STUART L. MARCUS, and LIEBE F. CAVALIERI. Synthesis of DNA Complementary to AMY RNA using *E. coli* polymerase I 247

RAMESHWAR K. SHARMA and JAMES S. BRUSH. Metabolic Regulation of Steroidogenesis in Adrenocortical Carcinoma Cells of Rat. Effect of Adrenocorticotropin and Adenosine Cyclic 3′,5′-Monophosphate on the Incorporation of (20S)-20-Hydroxy [7α^{3}H] Cholesterol into Deoxycorticosterone and Corticosterone. 256

P. FORTNAGEL and R. BERGMANN. The Synthesis of MS 1 and MS 2 by *Bacillus subtilis* 264

ALAIN FAVRE, UMBERTO BERTAZZONI, ANTON J. M. BERNS and HANS BLOEMENDAL. The Poly A content and Secondary Structure of the 14S Calf Lens Messenger RNA 273

Announcement 281

ERRATA

Volume 44, Number 5, September 3, 1971: G. A. White, A Potent Effect of 1,4-oxathiin Systemic Fungicides on Succinate Oxidation by a Particulate Preparation from *Ustilago* maydis, pp. 1212-1219 282

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 × 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation.

Manuscripts should be double-spaced on one side of the sheet; **references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the Commission on Biochemical Nomenclature Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115,** 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be created in accordance with the rules of the NAS-NRC Office of Biochemical Nomenclature and **must be defined in a footnote,** rather than in the text. Such abbreviations **must not** be used in the Summary. The improper use of abbreviations may necessitate the return of manuscripts for retyping, thereby delaying publication.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use of the Enzyme Commission ("EC") code number is recommended.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol for the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1973) **154,** iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be done with a mechanical lettering set (e.g., Leroy; lettering size 120 or 140) and black ink. Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 × 8 in.); the original drawings must be planned accordingly.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969.* Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys. 142, 363-370.

For a book by one or more authors:

2. Robison, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms are sent to the authors immediately upon acceptance of their manuscript. The price list is included.
